

The machine name: Polarography

Model: 797

Manufacturer: Metrohm

Country: Switzerland

Specifications: Polarography on a renewed dropping mercury electrode (DME) or static mercury drop electrode (SMDE); Voltammetry on a hanging mercury drop electrode (HMDE) or a glassy carbon electrode (CGE); manual sample injection; quantification by standard addition.

Instrument application: Qualitative and quantitative analysis of redox active compounds by current-voltage measurements in an electrochemical cell.
